Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objection

Claims 1-17 are objected to for minor informalities. The employment of parenthetical expressions e.g., "(1-6C)" in claim 1 is considered informal. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-13 and 18-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 12-13 recite the limitation "x is 4 or 5" in the claim. There is insufficient antecedent basis for this limitation in the claim.

Claims 18-24 provide for the use of a compound of formula herein in claim 18, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 18-24 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper

definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

In order to expedite prosecution, these claims will be examined on the merits as a method of manufacture herein.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Gold et al. (N, PTO-892).

Gold et al. disclose that the same 1-aminoalkylcyclohexanes as herein are useful in the treatment of CNS disorders or a living animal for alleviation of a condition which is alleviated by an NMDA receptor antagonist. Gold et al. also disclose a method of manufacture of the instant claimed compounds. See abstract, pages 10-20, and claims 12 and 23 of Gold et al. The instant claims 1-17 are drawn to a method of treating a living animal for inhibition of progression or alleviation of a condition which is alleviated by a 5HT3 or neuronal nicotinic receptor antagonist such as emesis, anxiety disorders, schizophrenia, depressive disorders, cognitive disorders, Alzheimer's disease, pain, and

Art Unit: 1617

appetite disorders (see the instant claim 1 and 14) comprising same compounds herein. Therefore, the teachings of Gold et al. would be inherent in the instant claimed methods. See *Ex parte Novitski* 26 USPQ 2d 1389. Note that the amount of active compounds to be administered in instant invention is same as in Gold et al. See Gold Example 1-10 of pages 31-35. Therefore, Gold et al. anticipates the claims.

In view of the rejections to the pending claims set forth above, no claims are allowed.
